2017 March to Nov - Multiple US Embassy contact attempt ignored

After calling the US embassy in London I am put through to the 'regional security' desk on three or four occasions, the first around March 2017, then June and finally in November 2017. I repeat my claims of having met al Qaeda members in Yemen in 1997 as succinctly as I can each time before being told:

"it will be passed up"

or

"someone will get back to you"

When I ask for protection from repercussion to my having exposed al Qaeda's operational structure and activities in Taiz, Yemen in 1997 they told me:

"someone will reach out to you"

My phone records to the US embassy, London:
